

Portfolio Scan

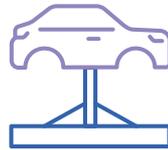

Reveal Hidden Risks. Protect Profitability

Every insurer holds hidden risks in its portfolio.

Here are a few typical examples

UNDECLARED ROOFTOP SOLAR PANELS

CAR REPAIR WORKSHOP PERFORMING VEHICLE DISMANTLING ACTIVITIES

GO-KARTING FACILITY DECLARED AS MECHANICAL SERVICE AND REPAIRS

NIGHTCLUB DECLARED AS A RESTAURANT

Keeping your portfolio under control is more challenging than ever

Risks don't stand still. Even policies perfectly underwritten years ago may now contain material misqualifications that can erode your portfolio's profitability.

Even a small number of misclassified risks can generate significant losses and add up to two points to the combined ratio.

These critical exposures are difficult to detect with fragmented, reactive update processes.

Do you know how many are currently in your portfolio?

You need a smarter, automated, and proactive way to stay ahead.

The SaaS platform for P&C insurers to reveal hidden risks across their entire portfolio

Protect Your Combined Ratio

Uncover hidden risks early and act through remediation or contract updates, before they escalate into costly claims.

Gain Full Visibility Across Your Portfolio

Analyze 100% of your policies using external data to detect misclassified, outdated, or underinsured risks.

Focus on what truly drives performance

Prioritised insights help underwriters concentrate only on high-impact policies, boosting efficiency and precision.

Customer challenges

- Rising loss ratios
- Pressure on profitability
- Limited visibility into portfolio quality

Continuity's approach

- Proof of Value based on a representative portfolio sample.
- 10,000 commercial lines policies analyzed through the Portfolio Scan.

Measured results

- More than 500 anomalous policies identified, including

ROI exceeding £3M (€4M+)

- 350 policies with premiums adjusted to reflect the actual risk
- 150 policies cancelled or non-renewed

Launch your Proof of Value

Duration: one month

No IT integration required and minimal workload for underwriting teams.

Trusted by leading insurers
